

USABILITY DOCUMENT

SmartKids can be used as follows:-

1. Classroom teaching :

Smart kids can be used to teach the kinder garden kids to write the alphabets and also to listen to their pronunciations. Smart kids will also help the children to associate each alphabet with a word and the image that is displayed along with the written form of the alphabet and the sound will further help to accelerate the process of learning amongst the kids.

2. Practice at Home :

The kids these days normally play games on their parents mobiles. With smart kids, the parents can make their children learn alphabets and poems with the help of a very pleasing interface . Digitalizing the process of learning will also help to save paper and will be beneficial to the environment in the longrun.
